

## Daily Geography - Week 26

### Monday

1. The Sahara Desert covers northern Africa from the Atlantic Ocean (on the west side) to which sea (on the east side)?
2. The Sahara Desert covers 3.5 million square miles. Does that mean it is much smaller, roughly equal to, or much larger than the size of the contiguous U.S.?

### Tuesday

1. Which two physical features help to make parts of the Sahara Desert more liveable?
2. Which famous river flows through the northeastern edge of the Sahara Desert?

### Wednesday

1. The Sahara has about 90 large oases. What is an oasis?
2. Why can most desert animals go for long periods of time without water?

### Thursday

1. Name the two most southern rivers listed on the map.
2. About how many people live in the Sahara Desert?

### Friday

1. Which is not a typical animal found in the Sahara?
  - a) Fennec
  - b) Fox
  - c) Vulture

d) Bear

2. **True or False:** Some plants in the Sahara take moisture from the air through their leaves.
