

Daily Geography - Week 27

Monday

1. The population statistics on the map and chart are from which government agency? The statistics are from which year?
2. Which country in the world was the most populous in 2002? Is the population of that country in the millions, billions, or trillions?

Tuesday

1. What was the population of the United States in 2002?
2. Which continent has the most countries in the "top ten list?"

Wednesday

1. Which country had a population of almost 180 million in 2002? In which continent is this country located?
2. How many countries had a population of over 150 million in 2002? Name them.

Thursday

1. What is the difference in population between the most populous and least populous countries on the list?
2. The world's population went over six billion in 1999. The estimate for the world's population in 2050 is over what?

Friday

1. Which continents do not have any of the top ten most populous countries in the world?

- a) Greenland
- b) South America
- c) Africa
- d) Australia

2. **True or False:** China and Japan had a larger combined population than India and the U.S
