

Daily Geography Week 9

Monday

1. Without looking at your map, picture a map in your mind. What kind of map do you visualize?
2. Without looking at your map, explain which country is north of the U.S. and which country is south of the U.S.

Tuesday

1. Look at the shape of the United States on your map. Name two states that border the Pacific Ocean.
2. Look at the shape of the United States. Name two states that border Mexico.

Wednesday

1. Study the seven countries that make up Central America. Turn over the map and list as many as you can remember.
2. Which large island is part of North America, but belongs to a country in Europe? The island territory belongs to which country?

Thursday

1. Picture Alaska within the borders of the contiguous United States. Is Alaska smaller, larger, or the same size as Texas?
2. Which island that is labeled in the Greater Antilles is not a country, but rather a part of another country?

Friday

1. Which island is NOT a Greater Antilles island nation?
 - a) Cuba
 - b) Dominican Republic
 - c) Haiti
 - d) The Bahamas
2. **True or False:** Central America consists of eight countries.
