

## Practice with Exponents

Example:  $2^3$

Base:

Exponent:

Expanded Form:

Answer:

Answer

## Practice with Exponents

$$4^2$$

What are the following:

Base:

Exponent:

Expanded Form:

Answer:

Answer

## Practice with Exponents

$$1^4$$

What are the following:

Base:

Exponent:

Expanded Form:

Answer:

Answer

## Practice with Exponents

$$5^3$$

What are the following:

Base:

Exponent:

Expanded Form:

Answer:

Answer

## Practice with Exponents

Evaluate the following:

Click box to check answers

$2^6 =$

$8^2 =$

$3^3 =$

$10^4 =$

$10^0 =$

$7^4 =$

$6^3 =$

$1^{51} =$

## Practice with Exponents

What is the expanded form of each of the following?

$$6^5 =$$

$$10^4 =$$

$$1^3 =$$

$$3^1 =$$

$$4^2 =$$

$$7^4 =$$

$$8^6 =$$
