

# MOUNTAIN STATES

Arches National Park has over 2,000 sandstone arches. Landscape Arch is one of the world's longest natural arches. It is 291 feet (89 m) long.

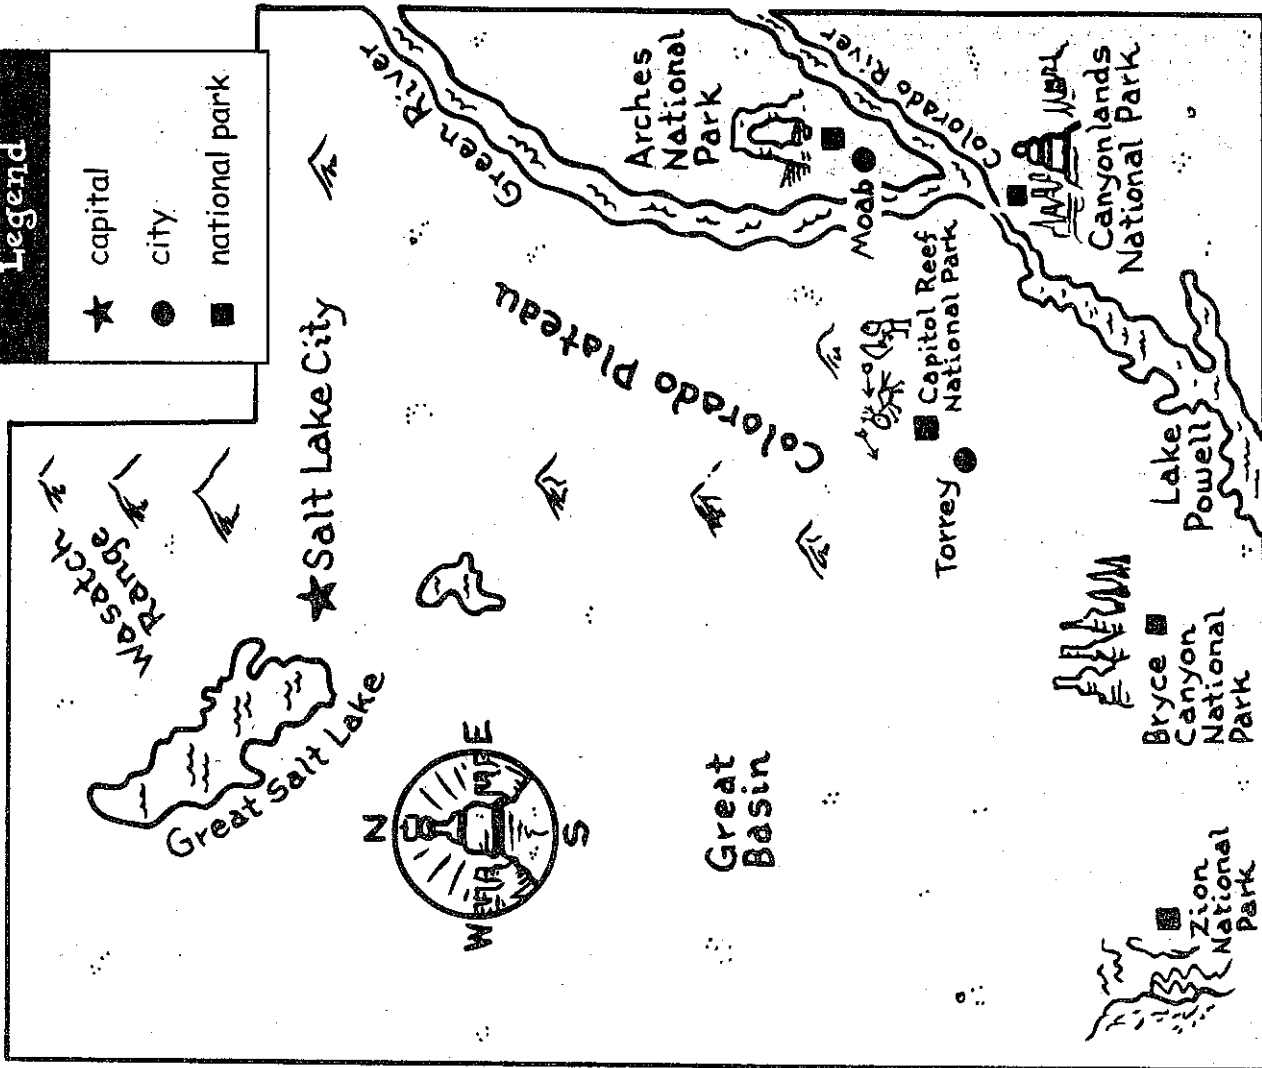

Bryce Canyon National Park contains unusual rock formations that are in more than 60 shades of copper, cream, pink, and red. Rocks are in the shapes of castles, cathedrals, and even wild animals.

Canyonlands National Park is noted for its red rock canyons, sandstone spires, and a series of canyons called the Maze.

Capitol Reef National Park is famous for its long ridge that is topped by white sandstone that looks like a capitol dome. Petroglyphs and pictographs left by the Fremont Indians can be seen on cliff walls.

Zion National Park is known for its steep and narrow canyons and its unusual rock formations. Zion Canyon in the park is about 10 miles (16 km) long. Its walls reach 3,000 feet (910 m) high in some places.
