

## **Daily Geography Week 5**

### **Monday**

1. What two names are given for the lines that run around the Earth in an east-west direction?
2. What two names are given for the lines that run around the Earth from the north to the south?

### **Tuesday**

1. The map of Australia is shown on a geographic grid. What does that mean? (hint: read the front of the map)
2. Is it possible to find coordinates on the map of Australia? Why or why not?

### **Wednesday**

1. Which states of Australia have land area along the latitude line of 30 degrees south?
2. Which state in Australia would include the coordinates 43 degrees south latitude, 148 degrees east longitude?

### **Thursday**

1. What is the capital of the Northern Territory? Estimate its coordinates.
2. What is the name of Australia's national capital? Estimate its coordinates.

### **Friday**

1. Why are all the lines of latitude labeled "S," and all the longitude lines labeled "E"?
  - a) Australia is south of the equator and east of the prime meridian.
  - b) Australia is south of the lines of longitude and east of the lines of latitude.
  - c) The "S" stands for South Australia and the "E" stands for East Australia.
  - d) The "S" stands for the states of Australia and the "E" stands for everyone who lives there.
2. True or False: Timor Sea is located next to the coordinates 10 degrees south, 130 degrees east.
